

# James Lampkins

Full Stack Application Developer

San Antonio, TX | [GitHub](#) | [LinkedIn](#)

## PROFILE

---

Full-stack developer with 7+ years of experience delivering enterprise applications in financial services. Proven ability to lead modernization initiatives, coordinate cross-functional teams, and ship production systems under tight deadlines. Known for technical versatility, clear communication, and consistently exceeding performance expectations across concurrent workstreams.

## EXPERIENCE

---

### Application Developer

2018 – Present

SWBC — Financial Institution Group

Remote | San Antonio, TX

Progressed from junior developer to senior full-stack contributor owning multiple systems and leading cross-team initiatives.

- Led modernization of legacy .NET systems to .NET 8, including message bus upgrades and containerization with Docker and AWS ECS
- Managed migration of 10+ applications across server and database environments through all deployment stages
- Built a centralized API gateway for service bus connectivity, reducing onboarding friction for downstream teams
- Coordinated cross-company deployments with external partners including authentication system rewrites
- Mentored onshore and offshore developers through sprint planning, code review, and
- Architected and delivered a claims processing portal, remittance system, and borrower-facing web application end-to-end
- Designed secure document routing integrations with third-party ML/AI vendors, delivering ahead of schedule
- Led daily rapid-response standups coordinating issue resolution across multiple development teams
- Migrated call recording infrastructure to cloud storage (S3), improving retrieval performance
- Won company Hackathon award for "Most Likely to Go to Production" — recognized for

production deployment processes

innovation and feasibility

## EDUCATION

---

### Codeup

2019

Certificate of Completion, Computer Software Engineering — Java Full Stack Development

Fully-immersive, project-based 18-week career accelerator providing 600+ hours of expert instruction in full stack development. Approved by the Texas Workforce Commission and the US Department of Veterans Affairs.

### The University of Texas at San Antonio

2006 – 2012

Bachelor of Arts, Criminal Justice

## RECOGNITION

---

"Rarely does an employee impress a manager on a difficult application or initiative. It's rarer still when an employee impresses multiple managers across multiple applications." — Manager evaluation, 2022
